Disclaimer and Forward-Looking Statements

Competent Person's Statement

The information in this report/presentation that relates to Exploration Results and Mineral Resources is based on information compiled by Mr Armando Massucatto who is a Member of the Australasian Institute of Mining and Metallurgy. Mr Massucatto is employed by Mundo Minerals Limited and is the Company Exploration Manager. Mr Massucatto has sufficient experience which is relevant to the style of mineralisation and the type of deposits under consideration and to the activity which he is undertaking to qualify as a Competent Person as defined in the 2004 Edition of the "Australasian Code for Reporting of Exploration Results, Mineral Resources and Ore Reserves. Mr Massucatto consents to the inclusion in the report/presentation of the matters based on his information in the form and context in which it appears.

JORC – Exploration Targets

It is common practice for a company to comment on and discuss its exploration in terms of target size and type. The information in this presentation relating to exploration targets should not be misunderstood or misconstrued as an estimate of Mineral Resources or Ore Reserves. Hence the terms Resource(s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature, since there has been insufficient work completed to define them beyond exploration targets and that it is uncertain if further exploration will result in the determination of a Mineral Resource. In accordance with Clause 18 of the JORC Code, it is important to note that no JORC Mineral Resources or Ore Reserves have been established on these tenements and any current assessment remains subject to ongoing exploration work and drilling. The current interpretation remains preliminary and is based on surface indicators, assays from underground channel samples, geological modelling, historical production records (in the case of Jaqueira and Torrecillas) and an assessment of the strike and width assessed from surface expressions.

Forward-Looking Statements

The document(Document) is provided on the basis that none of Mundo Minerals Limited ACN 117 790 897 (MUN) nor its respective officers, shareholders, related bodies corporate, partners, affiliates, employees, representatives and advisers make any representation or warranty (express or implied) as to the origin, validity, accuracy, reliability, relevance, currency or completeness of the material contained in the Document and no responsibility is taken for any errors or omissions. Nothing contained in the Document is, or may be relied upon as, a promise, representation or warranty, whether as to the past or the future. MUN excludes all warranties (including implied warranties) and all liability that can be excluded by law for any loss, claim, damage, cost or expense of any nature arising out of that Document (or any accompanying or other information) whatsoever, nor by reason of any reliance upon it. MUN accepts no responsibility to update any person regarding any inaccuracy, omission or change in information in this Document or any other information made available to a person nor any obligation to furnish the person with any further information.

The Document may contain prospective financial material which is predictive in nature and based on certain assumptions. Accordingly, actual financial results may be affected by assumptions which prove to be inaccurate or by known or unknown risks and uncertainties, and are likely to differ, possibly materially, from results ultimately achieved. The Document may contain "forward-looking statements". All statements other than those of historical facts included in the Document are forward-looking statements including, without limitation, (i) estimates of future earnings, and the sensitivity of earnings to the gold and other metals prices; (ii) estimates of future gold and other metals production and sales; (iii) estimates of future cash costs; (iv) estimates of future cash flows, and the sensitivity of cash flows to gold and other metals prices; (v) estimates of future capital expenditures; and (vi) estimates of reserves, and statements regarding future exploration results and the replacement of reserves. Where MUN expresses or implies an expectation or belief as to future events or results, such expectation or belief is expressed in good faith and believed to have a reasonable basis. However, forward-looking statements are subject to risks, uncertainties and other factors, which could cause actual results to differ materially from future results expressed, projected or implied by such forward-looking statements. Such risks include, but are not limited to, gold and other metals price volatility, currency fluctuations, increased production costs and variances in ore grade, recovery rates or other matters from those assumed in mining plans, as well as political and operational risks and governmental regulation and judicial outcomes. MUN does not undertake any obligation to release publicly any revisions to any "forward-looking statement" to reflect events or circumstances after the date of the Document, or to reflect the occurrence of unanticipated events, except as may be required under applicable securities laws.

All persons should seek appropriate professional advice in reviewing or considering the Document and all other information with respect to MUN and evaluating the business, financial performance and operations of MUN. Neither the provision of the Document nor any information contained in the Document or subsequently communicated to any person in connection with the Document is, or should be taken as, constituting the giving of investment or financial product advice to any person in respect of dealing in MUN securities, and no such information should be taken to constitute a recommendation or statement of opinion that is intended to influence a person in making a decision to deal in MUN securities. This Document does not purport to contain all of the information that may be required to evaluate all of the factors that would be relevant in determining whether to deal in MUN securities, including but not limited to any person's objectives, financial situation or needs. Each person should make, and will be taken to have made, its own investigation, assessment and analysis of the information in this Document and other matters that may be relevant to it in considering whether to deal in MUN securities.

Our Vision for Mundo Minerals...

- To establish sustainable and profitable gold production of ~ 150,000oz pa in South America within three years by:
 - Bringing our flagship 15g/t Torrecillas Project in Peru on stream at a production rate of 80-100,000oz pa
 - Increasing production from our established Engenho Project in Brazil to ~50,000oz pa
- To increase our resource base to sustain this level of production for +8 years
- To achieve a safety record that is better than industry standard in each country and heading to, or equalling, world standards
- To maximise value and returns for our shareholders

Powered by Peru – A Snapshot of Mundo in 2012

- **Torrecillas (Peru) will be ramping up to production of 80-100,000oz pa at +15g/tAu head grade and forecast cash cost of <US\$400/oz**
- **Production at Engenho (Brazil) will have doubled to ~50,000oz pa at forecast US\$565/oz cash cost following development of the new Crista open pit mine with emerging additional production from the Olhos open pit target**
- **Company-wide production will be ramping up to 130-150,000oz pa, generating substantial free cash flow based on today's gold price**

December 2010 – Where we are today...

- Engenho Project (Brazil) producing at ~25,000oz pa from u/g mine
- Supplemented by ~8,000oz pa production from trial mining at Torrecillas (Peru) while Feasibility Study is completed (due 2H 2011)
- Excellent ongoing safety record and productivity improvements
- Exploration success in Brazil has defined new emerging production sources at Engenho including Crista open pit and Olhos
- Significant US institutional support secured as part of \$10-15M capital raising to underpin production growth objectives

2011 – Becoming a High-Grade Mid-Tier Producer

- To achieve our vision, Mundo has a very active and fully-funded exploration and resource development program in 2011
- **Torrecillas (Peru):**
 - Resource drilling to underpin maiden JORC resource
 - Feasibility Study leading to project financing and development approval
- **Engenho (Brazil):**
 - Underground drilling to extend mine life
 - Resource drilling at Olhos to deliver maiden open pit JORC Resource
 - Commencement of mining at Crista open pit, following receipt of final approvals
 - Resource extension drilling at Crista Deeps to underpin future underground mining

2011 – Growing the Gold Inventory

- US\$5.4M allocated to brownfields drilling programs in 2011:

Mine	Conceptual Exploration Target ¹				
Torrecillas	420-480kt	@	15-20g/t Au	for	220-250,000oz
TOTAL Peru	420-480kt	@	15-20g/t Au	for	220-250,000oz
Crista	1.1-1.4Mt	@	4-7g/t Au	for	250-285,000oz*
Engenho U/G	510-560kt	@	3-4g/t Au	for	45-55,000oz
Olhos	510-540kt	@	3-4g/t Au	for	60-70,000oz [#]
Ampar	850-900kt	@	6-7g/t Au	for	160-180,000oz ^Δ
TOTAL Brazil	3.0-3.4Mt	@	5-7g/t Au	for	515-590,000oz

•Target to 500m vertical depth # Target to 70m vertical depth to test open pit only Δ Target to 90m vertical depth only ¹ JORC – Exploration Targets

It is common practice for a company to comment on and discuss its exploration in terms of target size and type. The information relating to exploration targets should not be misunderstood or misconstrued as an estimate of Mineral Resources or Ore Reserves. Hence the terms Resource(s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature, since there has been insufficient work completed to define them beyond exploration targets and that it is uncertain if further exploration will result in the determination of a Mineral Resource.

A Peruvian Powerhouse – Torrecillas (100%)

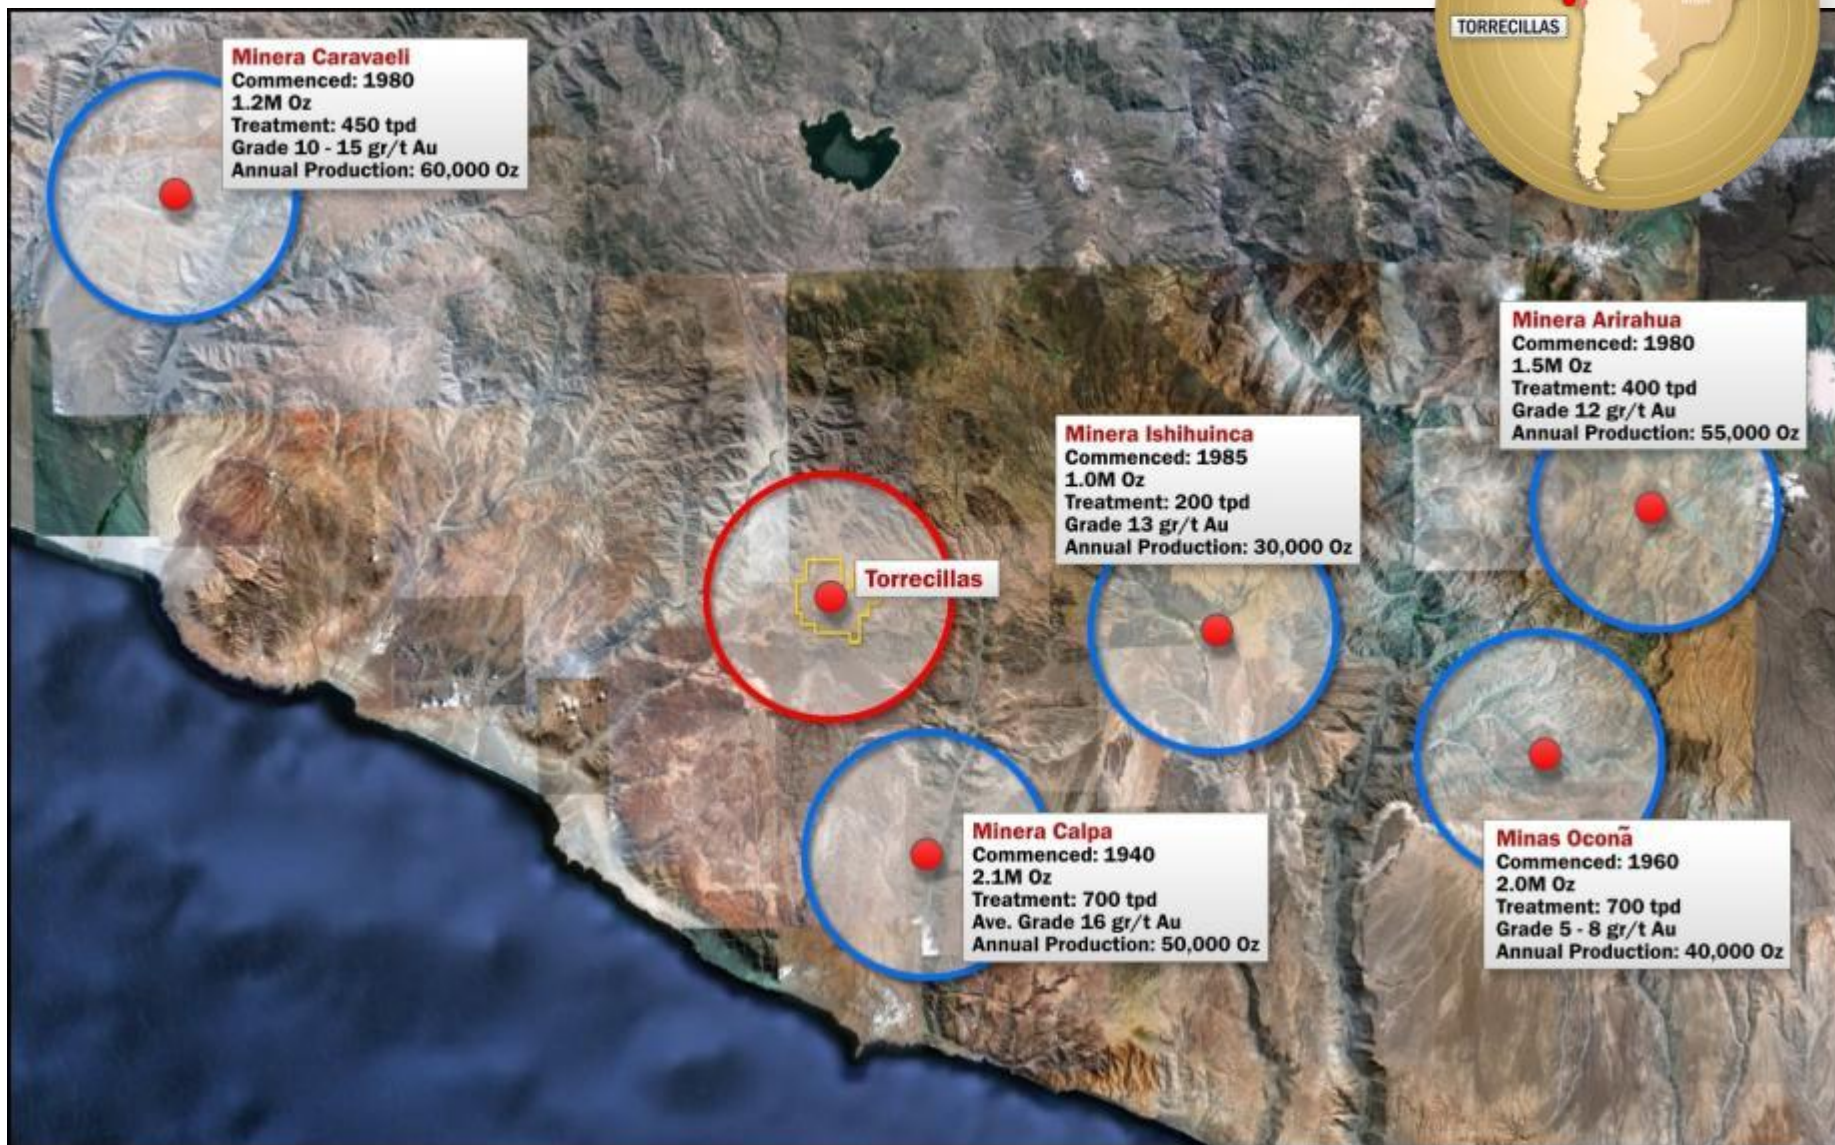

- High-grade 80-100,000oz pa project from 2012
 - production from three high-grade vein systems
 - forecast 15g/t head-grade to the mill, <US\$400/oz operating cost and US\$34M capital cost
- Bankable Feasibility Study – Q2 2010
- Successful trial mining underway for ~2 years:
 - has achieved average grades of 18-22g/t Au
 - shows the mineralisation is continuous
- 9,000ha tenement package in well-established gold belt in southern Peru:
 - close to several existing mines with extensive production track records
- Conceptual Exploration Target¹ of 420-480k tonnes @ 15-20g/t Au for 220-250,000oz:
 - drilling commencing to finalise JORC resource to underpin project financing and first 2-3 years of production

¹ JORC – Exploration Targets

It is common practice for a company to comment on and discuss its exploration in terms of target size and type. The information relating to exploration targets should not be misunderstood or misconstrued as an estimate of Mineral Resources or Ore Reserves. Hence the terms Resource(s) or Reserve(s) have not been used in this context. The potential quantity and grade is conceptual in nature, since there has been insufficient work completed to define them beyond exploration targets and that it is uncertain if further exploration will result in the determination of a Mineral Resource.

Torrecillas – A Prolific Gold Belt

Torrecillas – A 15g/t Cash Machine

Torrecillas Mine and
Proposed On-Site Treatment Plant
Target: ~80-100,000oz pa
production

- Integrated underground mining operation with decline access to three high-grade vein systems
- Targeting production of 15,000 tonnes per month at a head grade of 15g/t Au to the mill
- Mining strategy supported by trial mining and regional comparisons

Torrecillas – A 15g/t Cash Machine

Torrecillas – Preparing for Launch

- Development work currently focused on 5 Noviembre and Torrechico Veins
- Drilling commencing to finalise JORC resources:
 - Surface drilling at Torrechico and 5 Noviembre
 - Underground drilling at Torrecillas vein
- Trial mining to continue from existing developed areas while Feasibility Study is completed
- Ongoing resource development strategy is to replace production on an annual basis:
 - Exploration strategy tailored to high-grade, narrow vein style of mineralisation

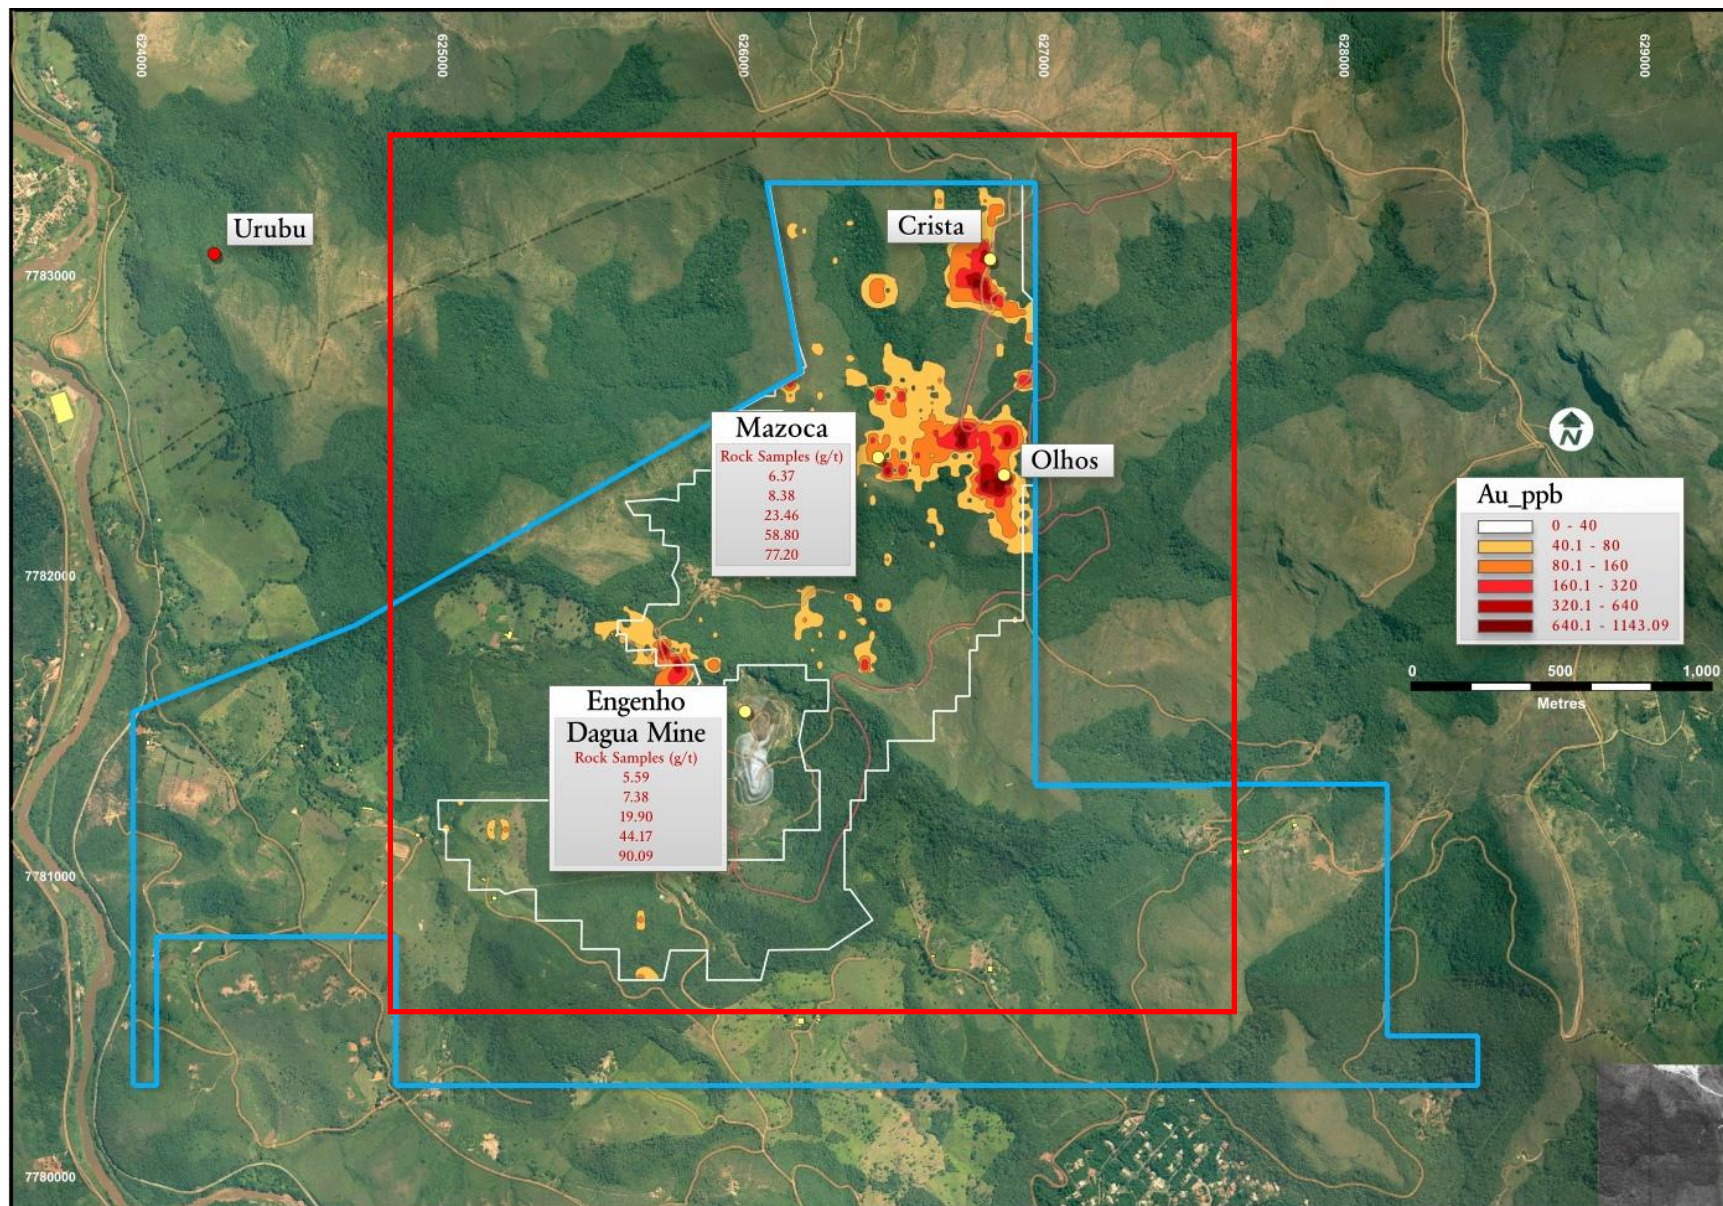

Torrecillas – Feasibility Study Highlights

- Forecast C1 cash operating costs of less than US\$400/oz
- Forecast capital expenditure of ~US\$34 million including mill, mining plant, road, water, power and development
- Gold recoveries of 92-95% achieved from metallurgical test work at two laboratories
- Initial gravity test work delivers up to a 70% recovery
- Assessment of optimal mining methods currently underway to minimise dilution
- Water sources close to the mine being examined for the processing plant and camp

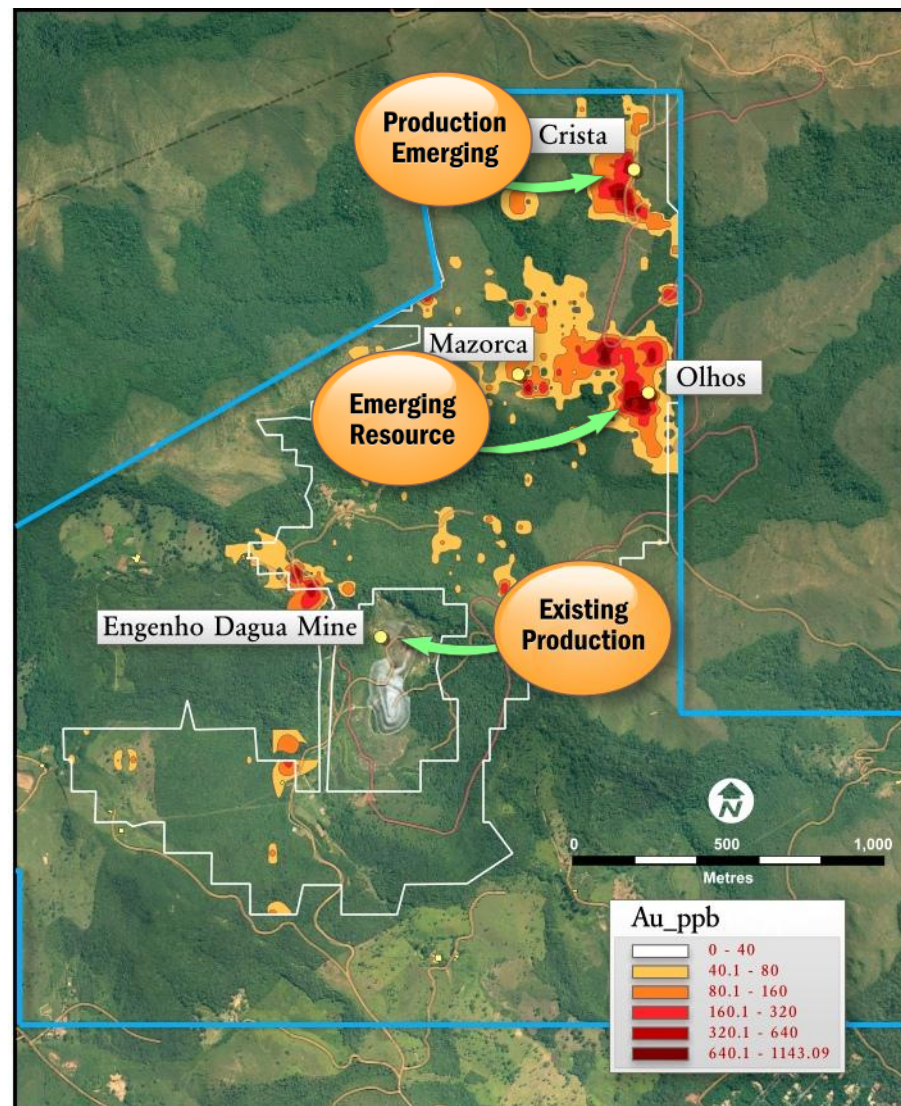

Engenho - An Emerging Multi-Deposit Gold Province

Engenho - An Emerging Multi-Deposit Gold Province

Emerging multiple gold resources and growing production base from 100%-owned tenements...

- Proven consistent production from existing underground mining operations
- Near-term emerging production from open pit mining at Crista
- Emerging resource potential at Olhos
- Numerous untested exploration targets within broader 711ha tenements
- Broader regional exploration strategy to be pursued to unlock this potential

Cashflow Today – Engenho (100%)

- Engenho currently producing at ~25,000oz pa @ ~3g/t Au head grade from underground mine
- Metallurgically stable ore profile averaging 93-94% and excellent mine/mill reconciliations
- Recent exploration success has defined new emerging production centres at Crista and Olhos, within a 2km radius of the existing plant
- Production expected to double to ~43,000oz pa with imminent development of new Crista open pit (~5g/t Au):
 - Final development approvals expected first half of 2011
 - Initial forecast production of 18,000oz pa for 18 months from the open cut then moving underground
- Broader exploration to unlock the significant potential of the northern satellite areas – maiden diamond drilling at Olhos and Crista Deeps planned for 2011

Engenho – Production Growth

- Infrastructure upgrades to expand the treatment facility to 440,000tpa capacity nearing completion
- Upgraded plant and infrastructure to accommodate ore from Crista pit:
 - *Second ball mill*
 - *Larger crusher with +600,000tpa capacity*
 - *New tankage*
 - *New tailings dam*
- Modular plant design enables further expansion to accommodate additional new satellite ore sources

Crista – A New Ore Production Centre

- New high-grade open pit
- Budgeted cash operating costs of US\$395/oz due to softer ore, more efficient milling & economies of scale
- Phase 1 Measured, Indicated and Inferred Resource of 161,948t @ 5g/t Au (26,034oz) using 2.5 g/t cut-off
- Initial mining model from open pit optimisation of 187,102 tonnes @ 4.5g/t for 26,969oz (1g/t cut-off)
- Deposit drilled to only 75m depth – Conceptual Exploration Target¹ of 1.1-1.4Mt @ 4-7g/t Au for 250-285,000oz to 500m depth – drilling in 2011

¹ Refer JORC Exploration Target comment on Page 7

Olhos – Another Open Pit in the Making

- Located 600m north of Engenho, 900m south of Crista
- Defined by auger drilling and surface exploration over 400m strike length
- Exploration Target¹ of 510-540kt @ 3-4g/t Au for 60-70,000oz to 70 metres (surface open pit only)
- Drilling planned for 2011

¹ Refer JORC Exploration Target comment on Page 7

Corporate Summary

Capital Structure

Shares:

- Shares on issue today **229.58M**
- Shares to be issued 7/4/11 **51.80M**
- 281.38M**

Options:

- Employee Options on Issue:
7.3M (Various strikes from \$0.15 - \$0.40)
- Other Options
3.0M (Various strikes from \$0.20 - \$0.80)
- Options to be issued 7/4/11
80.0M \$0.18 strike with 3-year term

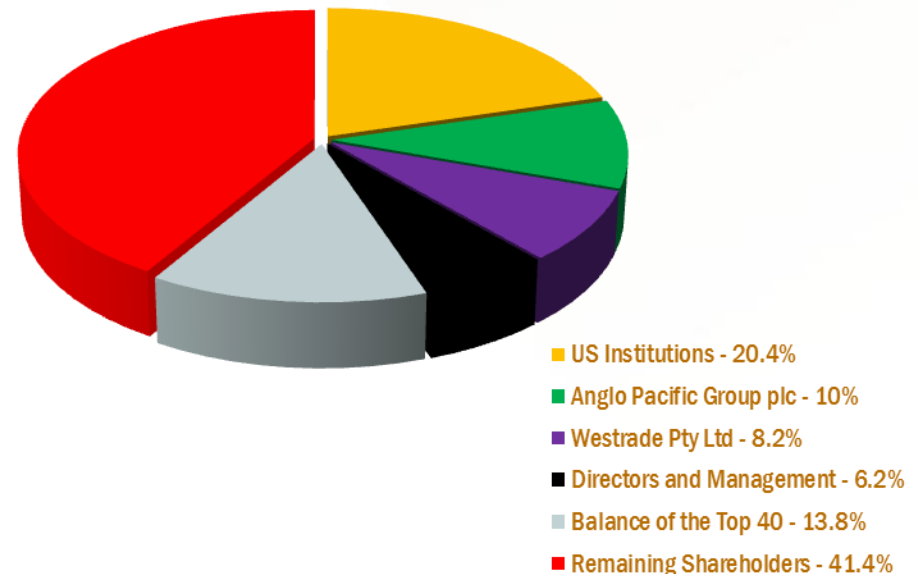

Market capitalisation: ~\$40M

Cash at bank post 7/4/10: ~\$9.5M

Directors & Key Management

- Barry Eldridge, **Chairman**
- John Langford, **CEO and Managing Director**
- Brian Hurley, **Non-Executive Director**
- Rob McKenzie, **Non-Executive Director**
- Mark Zeptner, **Chief Operating Officer**
- Ashley Pattison, **Chief Financial Officer**

Major Shareholders – post 7/4/11

Entering a Golden Period of High-Grade Growth

- US\$5.4M allocated to brownfields gold drilling programs in 2011 targeting the addition of ~ 750,000 ounces to our resource bank
- Development of flagship high-grade Peruvian gold mine imminent with 80-100,000oz per annum production, 15g/t Au head grade, <US\$400/oz cash cost:
 - **JORC resource and Feasibility Study by Q2 2011**
- Brazil production increasing to 43,000oz per annum in 2011 @ US565/oz cash cost with new open pit at Crista
 - **Final approvals expected Q1 2011**
- Well positioned to become a high-grade, low-cost mid-tier gold producer
