**John Langford**  
Chief Executive Officer

### About Mundo Minerals

Mundo Minerals is an Australian-domiciled international gold company with a portfolio of medium- sized gold projects in South America. Currently, the Company has four projects at different stages of development – three (including its first production asset) in Brazil and one in Peru.

Mundo Minerals' corporate strategy is based on the development of a sustainable production base of more than 250,000 ounces of gold per annum in the medium term. The Board has assessed all of the assets within the Mundo portfolio, at their current stage of development, as having strong potential to deliver a sustainable production base.

The Engenho Gold Project, which is located in the State of Minas Gerais in Brazil, is forecast to produce at an annualised rate of approximately 30,000 ounces per annum. Mundo's other assets in South America include the 100%-owned **Torrecillas Gold Project** in Peru, and the **Tocantins Gold Project** and **Jaqueira Gold Project** in Brazil. These projects have the potential to yield multiple resources to underpin the Company's long-term growth.

The Board is pragmatic in its approach to developing the corporate asset base and all projects will be developed according to robust commercial parameters.
